

TABLE OF CONTENTS

THE AUTHOR	ix
ACKNOWLEDGMENTS	x
PREFACE	xi
1 INTRODUCTION	1
1.1 The Responsibilities of the Gas Blender	1
1.2 Mixed Gases and Their Production	1
1.3 A Brief Description of Blending Methods	2
1.3.1 Mixing by Weight	2
1.3.2 Partial Pressure Mixing	4
1.3.3 Automatic Mixing	6
1.3.4 Continuous Blending	8
1.3.5 Permeable Gas Membrane Separation	9
1.3.6 Using Pre-mix	12
2 SETTING UP A BLENDING STATION	15
2.1 Safe System Design and Construction	15
2.2 An Overview of the Necessary Equipment	16
2.3 Planning the System Layout	16
2.3.1 Use of Air Banks	21
2.3.2 What Size of Air Bank?	22
2.3.3 Use of Nitrox Banks or Not?	26
2.3.4 Supply of Oxygen	28
2.3.5 Calculating Oxygen Requirements	28
3 GENERATING CLEAN AIR	31
3.1 What Is Clean Air?	31
3.1.1 Air Quality Requirements as Set by NS Research	32
3.2 Why Bother About Hydrocarbons When Mixing Nitrox?	35
3.3 Generating Oxygen Compatible Air	36

3.3.1 Oil-free vs. Double Filtration	36
3.3.2 Filtration Systems and Considerations	37
3.4 Air Quality Testing	39
3.4.1 Interpreting "Accuracy" of Testing	40
3.5 Water Content in Air	41
4 TUBING, HOSES, VALVES, AND FITTINGS	43
4.1 Tubing vs. Hoses	43
4.2 Tubing Selection and Specification	44
4.3 Tube Handling	47
4.4 Planning the Tube Layout	47
4.5 Use of Hoses and Their Selection	49
4.6 Selection of Fittings	52
4.7 Valves Selection	53
4.7.1 The Meaning and Importance of the Flow Coefficient	55
4.7.2 Interpreting the Valve Flow Characteristics	56
4.7.3 The Right Valve for the Right Job	56
4.7.4 Check Valves	58
5 SYSTEM CLEANLINESS	61
5.1 Oxygen Service	61
5.2 Oxygen Compatibility	61
5.3 Oxygen Cleanliness	62
5.3.1 Oxygen Cleaning Procedures for Valves and Fittings	64
5.3.2 How Clean Is "Clean"?	65
5.3.3 Burrs	66
6 LOGISTICS PLANNING	69
6.1 Calculating Your Oxygen Requirements	69
6.1.1 Variability and Uncertainty	70
6.1.2 Best Utilization of Oxygen	74
6.2 Time Planning	75
6.3 Consumables	77

7 THE PHYSICS OF PARTIAL PRESSURE MIXING	79
7.1 Pressure, Volume, and Mass	79
7.2 Understanding the Law of Partial Pressures	80
7.3 The Universal Gas Law	82
7.4 The Thermodynamic Situation in the Scuba Tank	84
7.5 Compressibility of Gases	86
7.6 How Does All This Affect the Accuracy of the Mix?	88
7.7 A Theoretical Explanation of the Effect of Temperature on the Accuracy of the Mix	91
8 MIXING PROCEDURES AND CALCULATIONS	93
8.1 Mixing Procedures	93
8.2 Mixing Calculations	95
8.3 Some Definitions	95
8.4 Calculations Using a Simple Formula	96
8.4.1 Simplifications for Mixing Air and Pure Oxygen	97
8.5 Calculations Using Mixing Tables	98
8.5.1 How to Use a Mixing Table	99
8.5.2 Linear Interpolation	100
9 GAS ANALYSIS	103
9.1 Oxygen Analysis Methods	103
9.2 Operation of Galvanic Cell Oxygen Analyzer	104
9.2.1 The Principle of Operation	104
9.2.2 Output Reading vs. Pressure	105
9.2.3 Correct Calibration Matters	107
9.2.4 Operating Life	108
9.2.5 Temperature Effects	109
9.2.6 Response Time	110
9.3 Oxygen Analysis Procedures	110
10 TRIMIX BLENDING	113
10.1 What Is Trimix?	113
10.2 Characteristics of Helium	114
10.3 Demands on Equipment	115

10.4	Mixing Calculations and Procedure	115
10.4.1	Calculations Using a Simple Formula	116
10.4.2	Mixing Procedure	117
10.5	Inherent Accuracy and How It Affects Dive Planning	118
11	ERROR ANALYSIS	119
11.1	Sources of error	119
11.2	Calculating the Resulting Error in Final Mix Composition	120
11.2.1	Inaccurate Analysis of Residual Gas	120
11.2.2	Inaccuracy Due to Error in Pressure	121
12	BUSINESS CONSIDERATIONS	125
12.1	Financial Considerations	125
12.1.1	Calculating the Cost of Nitrox Fills	125
12.1.2	Investment Appraisal for a Blending Station	128
12.2	Other Considerations	129
13	FAILURE MODE AND EFFECT ANALYSIS (FMEA)	131
13.1	What Is a FMEA?	131
13.2	What Does a FMEA Involve?	132
13.2.1	Calculating the Risk Priority Number	133
13.3	How to Construct a FMEA for a Mixed Gas Production System	133
14	POPULAR MISCONCEPTIONS	137
	APPENDICES	141
	Appendix A: A Note on Hydrometry	141
	Appendix B: PSA Systems	143
	Appendix C: Liquid Oxygen	147
	Appendix D: Gas Analysis Using Paramagnetic Technology	149
	Appendix E: Units of Pressure Conversion Table	151
	Appendix F: Nitrox Mixing Tables	153
	Appendix G: Software Tools for Gas Blending	159

The Author

*Nicos Raftis BA (Cantab), MA,
M.Eng., FCCT, AMIEE*

Mr. Raftis obtained his BA, MA, and M.Eng. in Manufacturing Engineering from Cambridge University, UK. Having obtained his Masters, Raftis specialized in fluid mechanics and thermodynamics. He worked on a number of consulting projects for companies including Dowty Aerospace Seals, Marshall Specialist Vehicles, Allied Signal Turbochargers, Tudor Webasto, and Emerson Electric. He is currently the CEO of NS Research Ltd.

He is a member of the Institution of Electrical Engineers (UK), a member of the American Production and Inventory Control Society (APICS), a Fellow of the Cambridge Commonwealth Trust, and an accredited consultant by the Cyprus Institute of Technology.

Mr. Raftis has been instrumental in the development of automatic gas blending systems and high performance filtration systems.

Mr. Raftis is a gas blending instructor trainer. He is also a contributor to professional diving journals and lectures frequently at international technical diving conferences.
