

Benchmark RATIO iX3M, the 3rd.

- After update to APOS 3.3.4 / 010 per 19.09.2016;
- start of dive, accu = 100 % (green)

Benchmark RATIO iX3M, the 3rd.

- After ca. 40 min into this dive here;
- accu = 0 % (red), TISSUE RESET:

Benchmark RATIO iX3M, the 3rd.

- TISSUE RESET during this dive, here after ca. 50 min;
- sometimes it looks like that:

Benchmark RATIO iX3M, the 3rd.

- during flight back;
- check of piezo sensor @ cabin pressure:

Benchmark RATIO iX3M, the 3rd.

- RMA request thereafter, send in: 25.10.2016
- Rcvd.: 29.10.2016

Re: new bug, 3rd benchmark

Benchmark RATIO iX3M, the 3rd.

- Answer after a couple of days;
- Rcvd.: 08.11.2016:

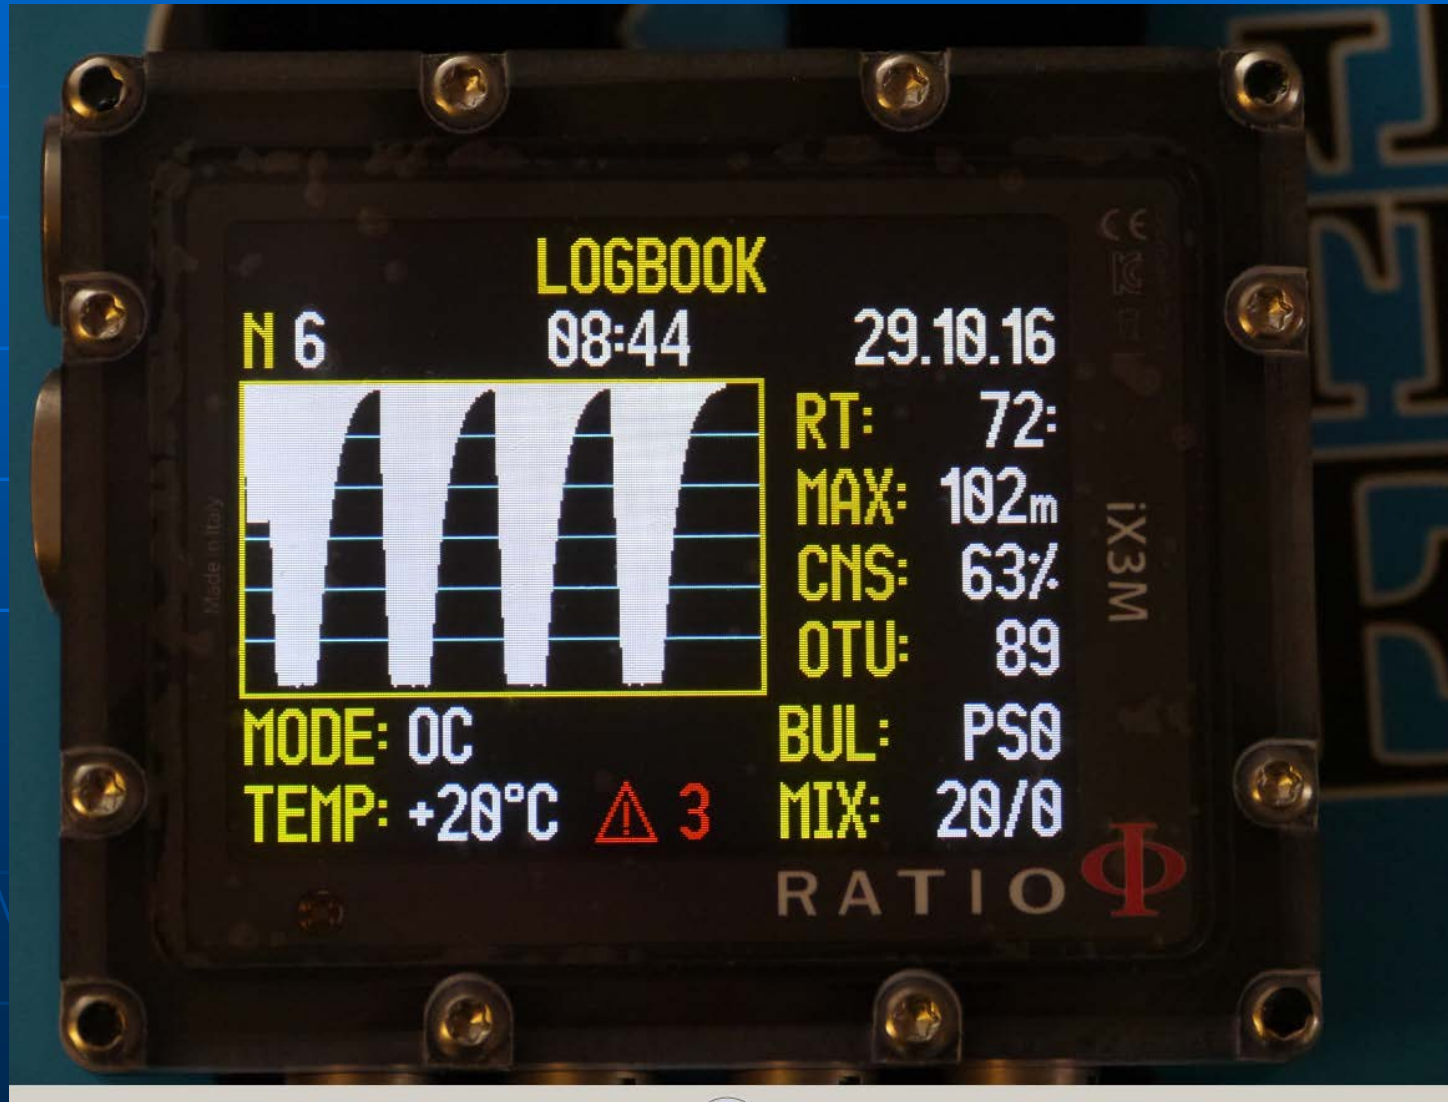

Benchmark RATIO iX3M, the 3rd.

- Results 1; new log entry:

Benchmark RATIO iX3M, the 3rd.

- Results 2; test dive in little wet-pot/ deco chamber:

Benchmark RATIO iX3M, the 3rd.

- All's well that ends well:
